

Proven leader in designing, deploying, and implementing highly secure solutions for on-premise and cloud-based computing environments in the DoD and the IC

CYBER SECURITY

Specializing in partnering with enterprises and government organizations, we comprehensively assess organizational security posture and build cyber security solutions that fit unique needs. Strong relationships with Mandiant, FireEye, F5, and CrowdStrike.

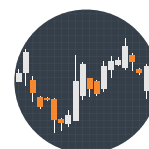

RISK MANAGEMENT FRAMEWORK

We have engineers experienced with both RMF and its predecessor DIACAP who know the requirements and how to implement a solution for you. August Schell has a team of security professionals and implementation engineers who can walk you through the 6-step process.

CLOUD INFRASTRUCTURE

August Schell can assist you with your cloud (private, public, hybrid) migration tasks. We can position you to take advantage of potential cost savings, deliver better IT agility and enable your organization's digital transformation using VMC (VMware Cloud on AWS, Azure, GCP) Public Cloud migration/hybrid design and implementation.

BIG DATA SOLUTIONS

As one of Splunk's premier Federal partners, our large team of services engineers has a wide range of expertise and is ready to assist your organization with large scale data analysis and trends so that your organization can make smart, fundamental business decisions and ensure the security of your systems and networks.

WHY AUGUST SCHELL?
